

EcoCaddy

The Ideal Curbside Food Waste Container

The 23 litre [6 US gallon] EcoSafe® EcoCaddy is an exceptional container for organic food waste collection. Developed to withstand the rigorous demands of both outdoor food waste collection and busy commercial environments, EcoSafe® caddies are an internationally-proven container that has been critical to the success of countless food waste collection programs of all sizes, varieties and climates.

Easy Handling, Hard Wearing

Handling features like three carefully designed grip areas, the 270 degree uniconstruction handle, a simple but robust hinged handle locking mechanism, and a perfect capacity and size make manipulation a pleasure for **residents and collectors alike**. And it can take some rough handling — thick walls, a pinless lid hinge, and substantial impact resistance all contribute to long container lifespan.

Versatile and Customizable

EcoSafe® EcoCaddies (and their perfect in-home counterpart, EcoSafe® kitchen caddies) are available in a choice of contemporary colors, with custom color options available. *(Color customization affects the maximum percentage of recycled content used in manufacturing.)*

Large surface areas provide ample labeling opportunities for commercial or municipal branding and program-specific reminders for accepted materials.

The perfect companion to the EcoSafe® **Kitchen Caddy** and EcoSafe® **Compostable Bags & Liners**, EcoSafe® products work together as part of a proven successful organic waste diversion strategy.

Three grip areas for outstanding handling: lip, handle, and bottom.

Right-sized to maximize weekly or bi-weekly collection without over straining workers during manual collection.

Composed of polypropylene or high density polyethylene with the highest possible recycled content available on the market.

Percentage of recycled content varies by color.

- strong single-piece handle
- ergonomic rear pivot handle with glove clearance
- pinless hinged **lock & seal lid**
- raised lid for rain run-off
- lid detaches on severe impact; easily reattaches
- **RFID ready** with incorporated nest area
- upper front shell grip for ergonomics
- large label areas for customization
- smooth, round-corner wipe-clean interior
- recessed, **textured base grip** for secure emptying
